

Contract Management, Theory Put to Practice

Course Format:

The workshop is a mix of presentations, interactive learning, and a multitude of individual and group case studies and exercises.

Pre-Requisites:

General Management and/or Project Management Knowledge

Duration:

4 full days; offered in the UAE and on demand at client's location

Contact Hours/PDU: 28

Course Description:

A thorough understanding of contracts and their diligent management is key to project success. This 4-days workshop combines the theory behind contract law with the best practices in procurement and contract management.

During this workshop, we will provide the participants with an overview of the contracting nexus and the theories behind various contract laws and contract forms and the most important procurement modalities, and in preparing and securing a contract that meets the set economic and technical objectives. In addition, participants will visualize the contracting relationships between the 'purchaser' and the 'contractor' and analyze the sensitivity of such a relationship.

For in-company training we could offer several variations/levels of this course (basic/advanced): service contract management; information systems contract management; supplies/equipment contract management; works contract management; as well as the possibility to concentrate on the procurement side of such projects and the methodologies to attain value for money.

Learning Objectives/Outcomes:

- Acquire an understanding of contract theory and laws
- Learn about the modalities for the preparation and acquiring of contracts in private/public sectors
- Discuss the terms of contracts for services, information systems, supplies and works projects
- Learn international best practices in the successful management of contracts and their relationships
- Discuss practical toolkits, vital checklists and several case studies

Who should Attend:

Contract administrators/managers, purchasing/procurement officers, project managers, claim consultants, business development officers, lawyers, managers, project team members, and other personnel involved in projects and who want an understanding of contract theory, types and best-practice management.
