Mounir Ajam

Workshop Facilitators

Mounir Ajam

Luc Bauwmans

Course Description:

All projects are inherently risky, and zero risk is not an option. The successful project manager will therefore be the one who manages risk effectively. Threats must be minimized and opportunities maximized, while maintaining a clear focus on achievement of objectives. This workshop takes the participants through the risk management processes that are required to effectively managing risks.

The workshop is line with global standards, primarily PMI® *a Guide to the Project Management Body of Knowledge*® and the *Practice Standard for Risk Management* but the workshop also draws on international best-practice. This course will provide proven tools to help the hard-pressed project manager deal effectively with risk.

Learning Objectives/Outcomes:

- Learn about risk as a form of uncertainty
- Understand the differences between threats and opportunities
- Understand risk tolerance and threshold
- Learn about the need for a proactive approach for effective project management
- How to recognize risk within your projects
- Learn how to apply techniques for prioritizing risks
- How to develop appropriate response strategies to identified risks
- How to ensure effective management of project risks

Who should Attend:

All personnel, project team members, managers, cost and schedule engineers, contract engineers or specialists, and project managers involved in projects or that are managing projects.

Risk practitioners who need to update their skills in line with the current *PMBOK*® *Guide*.
